

Contribute Resources Today

Consider contributing information about the resources your organization has created to KnowledgeToWork.com. You will be among industry leaders and KnowledgeToWork.com partners such as the AHIMA Foundation, Saylor Academy, Microsoft, the International Association of Administrative Professionals, and the MERLOT project.

Metadata are welcome for all types of instructional materials related to healthcare, IT, and manufacturing. The portal includes open educational resources (OER), videos, audio/podcasts, E-Pubs, MOOCs, online and traditional courses (credit and noncredit), mentors, internships, apprenticeships, bootcamps, assessments, tests, credentials, and badges in all formats. English and Spanish versions of the portal are currently available, but materials may be submitted in any language.

Knowledge to Work is grant-funded and your support is key to keeping this vision sustainable. A variety of image display sizes and text link ad positions are available for sponsorship, partnership, co-branding, and advertising.

Putting Knowledge To Work

KnowledgeToWork.com is a free portal that puts learners, employers, and job seekers together in an entirely new type of collaboration that uses competency frameworks mapped to instructional content. Created by Lord Fairfax Community College as part of a U.S. Department of Labor TAACCCT grant, Knowledge to Work offers a search engine of free and low-cost educational resources in high wage, high growth industries; personalized learning plans; a customized dashboard of learner progress; and a bank of career opportunities, employer profiles, and job search tools.

Closing the Skills Gap

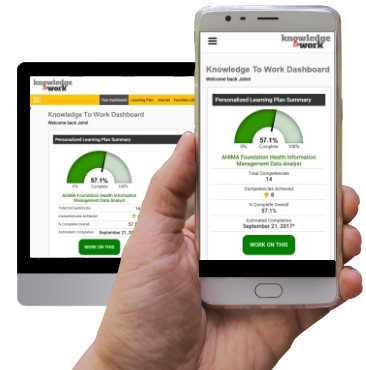

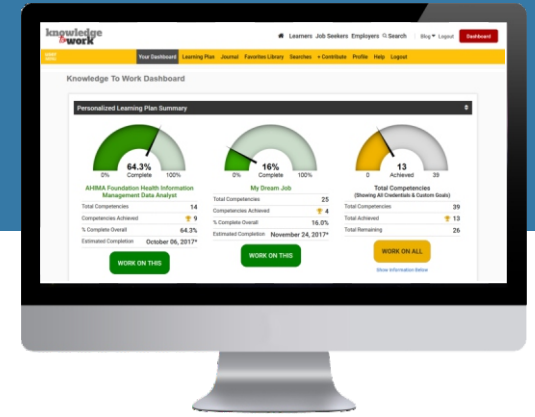

Whether you are just getting started down a career pathway, looking to change careers, or want to advance in the field you're already working in, KnowledgeToWork.com has tools to help you that you won't find anywhere else. These include: (1) information on a growing number of exciting and dynamic career pathways; (2) nationally-recognized competency frameworks that document the knowledge, skills, and abilities needed to be successful in these pathways; and (3) thousands of free and low-cost learning resources to learn and put competencies to work using your smartphone, tablet, and computer.

knowledge to work

Our Vision for CBE

LFCC is a proud member of the Competency-Based Education Network and our faculty and staff have benefited greatly from being part of C-BEN. We believe that promoting free and low-cost OER tied to competencies for personalized learning is another way to make college more affordable. Students can learn anytime/anywhere at a flexible pace, using the delivery formats they prefer, with curated content that meets quality standards.

Upon reflection, the knowledge, skills, and abilities gained through this portal can be used to document prior learning assessment and verify competency attainment, reducing the time and cost to complete a credential. The use of national competency frameworks makes learning more transparent and the job seeker more employable. By addressing student needs in the continuum of learning, from adult literacy to degree program requirements, competencies can be contextualized to the workplace. With a focus too on employers and job seekers, this approach removes barriers to success and ensures work readiness. In a complex world of career pathways and stacked and latticed credentials, the language of competencies is key to learning and to managing the talent pipeline. That's why we're proud to tell you about KnowledgeToWork.com. We encourage you to please tell your students and your employees about it so they can use it today!
