

Executive Summary

TAAACS: Filling out the 2021 Version

10/14/2021

Speaker: Robert Hoekstra

The Trade Adjustment Assistance (TAA) Administrative Collection of States (TAAACS) is a critical tool to determining state practice, integration, technical assistance needs, and potential promising practices. In 2021, the collection was revised to both reduce the burden of the collection and to increase the information collected in specific targeted areas. This webinar discusses the purpose of the TAAACS, the procedures for submission, and walks through the collection section by section to explain what is being collected and answer questions.

Run of Show
